

SPECIFICATION AMENDMENTS

Please replace the first full paragraph on page 4, with the following amended paragraph:

An antenna-incorporated semiconductor device according to the second aspect of the invention comprises an IC chip, a lead frame, a wire and an encapsulating resin similar to those of the antenna-incorporated semiconductor device according to the first aspect and further includes a coaxial cable connecting connector which is provided in an opening portion provided in a part of the encapsulating resin of the antenna-incorporated semiconductor device and has connection electrodes being the open end of the antenna element and ~~the other~~ an end portion of the encapsulating resin said ground electrode.
